PROFESSIONAL SUMMARY

Senior Flutter and cross-platform mobile developer with 5+ years of experience designing, developing, and deploying mobile applications across iOS, Android, and Web. Owns the full lifecycle from architecture and RESTful API/Firebase integration through testing, release, and support. Experienced as both an individual contributor and technical team lead, reviewing backend work, mentoring developers, and collaborating with product, design, and QA.

CORE COMPETENCIES

- Flutter & Dart (iOS, Android, Web)
- Cross-Platform Mobile Architecture
- RESTful & Backend API Integration
- Firebase (Auth, Realtime DB, Storage)
- Full App Lifecycle Ownership
- Mobile Team Leadership & Code Review

WORK EXPERIENCE

Hey!Jag Mar 2023 - present

Mobile Developer and Team Lead (Remote)

Florida, USA

- Own the full application lifecycle - from concept and design through build, deploy, test, release, and support - for distinct Driver, Restaurant, and Customer applications sharing one backend.
- Reviewed and tested backend developer's work, ensuring endpoint functionality and database integrity.
- Built the Customer App's integrated payment gateway and real-time order tracking via RESTful APIs.
- Enabled Driver App delivery management with Google Maps navigation and push notifications.
- Collaborated with UI/UX designers to maintain a consistent experience across all three apps.

WHMCSSMARTERS Jul 2023 - Dec 2023

Flutter Developer (Remote)

- Led Smart TV and cross-platform mobile app development using Flutter, reducing development time by 30%.
- Refined the codebase to improve readability, maintainability, and usability for white-label sales.
- Used Firebase authentication, real-time database, and cloud storage across the product suite.
- Integrated RESTful APIs, boosting user engagement by over 20%.
- Mentored junior developers through code reviews and technical best practices.

Freelance Jun 2022 - present

Mobile Developer and Tutor

- Delivered customized Flutter applications for clients across multiple freelance platforms, earning positive reviews and repeat engagements.
- Gathered requirements, translated them into technical solutions, and incorporated iterative client feedback.
- Provided Flutter tutoring with tutorials, code examples, and step-by-step guides.

Gammal Tech Jun 2020 - Nov 2022

Mobile Application Developer

Alexandria, Egypt

- Developed a course-management app with reliable database-backed content updates and deletions.
- Turned scattered course content into a structured, easily navigable learning application.
